37 Years of Invention, Unique Design and Extraordinary Craftsmanship

After three decades, WOM has greatly expanded their product offering, manufacturing capabilities and service to provide customers a single source to control a wide range of demanding flow applications found in all facets of the oil and gas industry. Through aggressive new product development and a willingness to take on new challenges, WOM continues to experience growth and expand its customer support-worldwide.

Today, WOM continues expansion of the India Facilities to include eighty acres of new space to accommodate the needs of it's worldwide clientele and maintain and surpass it's marketplace in the manufacture and production of Magnum Gate Valves, Blow Out Preventers, Manifold Systems, Custom Design & Manufacture, Ball Valves, Well Test Products, Subsea Intervention System ,Wellheads & Christmas Trees.

Since 1980

WORLDWIDE OILFIELD MACHINE

About WOM

India | In 1989, Worldwide Oilfield Machine India was founded in Pune, India to serve the worldwide market. The in-house forging plant known as Magnum Forge, was established in 1997. The success of Magnum Forge quickly opened the doors for Magna Casting in 1999. WOM India is a global company that presently employs approximately 1,500 employees.

Other WOM manufacturing and service facilities are also strategically located throughout the world.

Our line of products include:

- Magnum Gate Valve™
- Gate Valves for surface and subsea
- Wellheads and Christmas Trees
- Block Valves
- Ball Valves, Actuators
- Chokes and Manifolds for Well Testing
- BOPs

The WOM India Plant in Pune is located 120 miles South East of Mumbai

Worldwide Oilfield Machine

India Capabilities

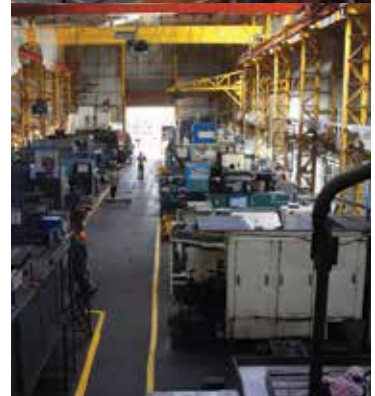

The WOM Mission | Worldwide Oilfield Machine's single objective is to provide the highest quality products, innovative designs, unsurpassed service and uncompromising reliability.

Worldwide Capabilities | Since its founding over thirty-five years ago, Worldwide Oilfield Machine's entire staff has focused on a single objective: to provide customers with the most reliable flow control products developed through technology, innovation and quality control.

In 1989, WOM established Worldwide Oilfield Machine, India, to provide support to the Middle East and Far East operations, as well as its plants located in strategic locations like Houston, Aberdeen, and Singapore.

WOM India's present manufacturing facility covers 14 acres and is expanding to over 200 acres in order to keep up with the demand for a wide range of products. WOM India has a highly qualified staff and has expanded to have its own forge facility and foundry making it vertically integrated to offer support throughout the world.

From the raw materials to the assembly of the finished packaged system, few can manufacture engineered API pressure control components like WOM India.

Commitment To Quality | WOM

India understands that the safety of the people operating our equipment, and that of the working environment is dependent on the quality of our workmanship. Identification and traceability allow us to maintain the highest quality of manufactured products. Inspection and a clean working environment ensures that our customers receive the premier equipment that only WOM India can offer. The products that WOM India manufactures meets or exceeds our client's most strict specifications. WOM India encourages its customers to provide feedback regarding the quality and performance of our products.

Quality Control |

WOM India is committed to providing the highest quality products possible while protecting the safety of its employees, customers, and the environment. All WOM India products are designed and manufactured according to API and ISO 9001 standards and specifications.

Worldwide Oilfield Machine

India Capabilities

Engineering | WOM India has a large staff of design engineers who take pride in innovation and continuous ongoing development of it's products.

The engineering staff takes an active interest not only in the design but also in the manufacturing and assembly activities of the products. WOM India has developed many innovative manufacturing processes and machine tools to cater to it's needs such as a ball grinding machine, made in-house, that can handle turning a ball up to 36" in size; as well as, in-house special purpose machines (SPM's) to handle drilling and other machine operations as well. The success of these machines and processes speaks volumes on the innovation and drive of WOM engineering.

WORLDWIDE OILFIELD MACHINE

Manufacturing | WOM products are manufactured by the highest applicable standards. Top of the line CNC machines are used for dimensional accuracy, precision machining and consistent high quality. Each product is inspected, assembled and tested with utmost care prior to shipment. This attention to detail ensures product quality and on-time delivery.

Processes needing extreme quality control such as the hardfacing of gates and manufacturing of seal assemblies are carried out in headquarters in Houston, Texas. All buyouts like fittings, elastomers such as “O” rings, and stem packings are supplied from Houston as well.

The assembly and testing procedure of all components and assemblies are performed in a controlled area free from contamination.

The assembly and testing conforms to API procedures, which are strictly enforced in order to maintain the high quality of our products, material specifications including heat treatment, mill tests and equipment tests are strictly documented in our manufacturing files which, when requested, can be supplied to the customer.

MAGNUM FORGE AND MACHINE WORKS

Magnum Forge is a manufacturer of open die and closed die forgings, engaged in manufacturing Oilfield and Power Transmission Components in various grades like low & medium carbon steel, alloy steel, stainless steel, Inconel, 17-4PH, duplex & super duplex.

The plant is ISO 9001 and PED 97/23/EC certified and fortified with experienced technocrats. The management and workforce of Magnum Forge maintain strict quality control procedures that conform to the standards set by the industry in which the product will be used. The plant has an annual capacity to forge more than 25,000 tons, ensuring quick delivery and competitive pricing.

Infrastructure | With a commitment to be a 'single point source' for its customers, Magnum Forge has the very best equipment for forging, machining, and testing qualified to produce forgings in a variety of configurations ready to meet virtually any customer requirement.

Forging | Pneumatic Close Die and Open Die Hammers, with highest capacity being a 16T close die hammer, ready to handle:

- Close die forgings up to 5000 kgs.
- Open die forgings up to 4000 kgs.
- Ring forgings up to 4000 kgs. & up to Dia.1500mm

Heat Treatment | Fully automated, electrically operated Quench plant with :

- Hardening Furnace -10MT/batch
- Tempering Furnace -15MT/batch
- Water + Synthetic (Polymer) Quenching tanks -100,000 liters each
- Charging Machine with capacity of 5MT

All heat treatment furnaces are calibrated and maintained as per API 6A.

Testing Facilities |

- Metallurgical testing
- Mechanical Testing: Tensile, ASTM Charpy, Spectrometer and PMI tester
- NDT: UT, MP, and LP
- Calibration Facility for measuring equipment

Products |

- Gate Valve and components
- Annular BOP and components
- Ram BOP and components
- Wellhead Forgings
- Well-Testing Forgings
- X-MAS Tree and Choke Forgings
- Ball Valve Components
- Dual Block & Spool Forgings
- Weco Union Assemblies
- High Pressure Fittings

Magna Casting produces high quality castings in carbon, alloy and stainless steel which conform to customer's stringent requirements and industry standards. With the worldwide oil and gas marketplace in mind, our management and staff are committed to satisfying our customer demands with an emphasis on the highest quality, timely delivery and competitive prices.

- Approximately 1080 Ton Annual Capacity
- Induction
- A.O.D. Unit
- Chemical Bonded Sand System
- Horizontal Centrifugal Casting
- Vertical Centrifugal Casting
- Mixer
- Sand Reclamation
- Band Saw
- Rajendra Lathe
- WMW Lathe
- Tos R-30 Lathe
- Spectro Meter
- Image Analyzer
- Carbon Sulphur Apparatus
- Universal Testing Machine
- Impact Testing Machine
- Metallurgical Microscope
- Sive Shaker
- Magnetic Particle Testing
- UT - Krautkammer USM-25
- PT - Ferrochem Test Kit
- Welding Rectifiers

CAST PRODUCTS

Ball Valve Bodies, End Connections, Seats

BOP, Bonnet Housing Std & LBS, Locking Screw Housing

Choke Bodies, Pump Saver Bodies, Mall Brain Choke Bodies, Bleed Choke Bodies

Actuator Housings

Inlet & Outlet Tees

Annular BOP Cage

Inner & Outer Sleeves (Annular BOP)

Cross Over Flange

Globe Valve Bonnet

APT Yoke Casting

Ingots-Pencil Square, Round & Fluted

H.T. Trays, F/C Doors, Trolley & Guide Plates

Integrated Shaped Tooling & Fixtures

WORLDWIDE OILFIELD MACHINE

Products | WOM India manufactures a variety of products from individual components to complete assemblies using state of the art machines and stringent quality control. This product line is designed and manufactured for exact standards to match customer's specifications including any custom designs. Today, the products are certified by API and CE/PED and all the facilities adhere to and exceed ISO standards.

Ball Valves
Gate Valves
BOPs
Pump Savers
Well Test Equipment
Wellheads
Well Test Choke Manifolds
