WORLDWIDE OILFIELD MACHINE

Choke & Kill Manifolds

WOM specializes in the manufacture of manifolds for a complete range of onshore and offshore applications. WOM manifold systems may incorporate WOM's Magnum gate valves, check valves, plug valves, chokes, and WOM actuators depending upon the application.

WOM manifold designs meet virtually any industry requirement, including H₂S environments up to 20,000 psi. Skid mounted and fully automated packages are available complete with control panels and instrumentation.

GATE VALVES

At the heart of WOM manifold systems, is the Patented Magnum Gate Valve. WOM's Magnum Gate Valves provide sealing reliability that is unmatched in the industry. The Patented design has been proven in hundreds of well control applications during drilling, testing, and production...onshore, offshore, and subsea. WOM also provides the Magnum Mud Gate Valve and the Model 200M Gate Valve as an alternative in many manifold systems.

WOM has developed a broad range of gate valve actuators for a variety of pressure control applications. Pneumatic and hydraulic actuators are available as Fail Open and Fail Close to match pressure control requirements and customer applications. Each type is manufactured to match valve sizes 1-13/16" through 9" with API ratings from 2,000 through 20,000 psi.

Magnum Gate Valve

CHOKES

WOM manufactures a wide range of low maintenance chokes. WOM chokes are manufactured to API 6A with a choice of trims, temperature ratings, and end connections to meet a variety of services. WOM drilling chokes are designed as per API 16C.

FEATURES AND BENEFITS

- Positive and Adjustable Chokes available in pressure ratings from 2,000 psi to 15,000 psi
- Positive and Adjustable Chokes available with inlet and outlet flanges from 2-1/16" to 5-1/8"
- Control Chokes are available with a plug & cage or an external sleeve trim. These chokes are designed to provide accurate flow control throughout its operating range.
- WOM drilling chokes offer the customer increased service life and cost savings in high pressure drilling operations especially where substantial amount of abrasive fluids are present.
- Drilling chokes are available in 1-3/4" orifice trim with 5000 to 15000 PSI pressure rating.
- The disc type choke valve is designed for MPD packages (Managed Pressure Drilling) polluted media & high pressure differentials.
- Disc type choke valve is available in 1", 1.5" and 3" maximum orifice trim with 5000 to 15000 PSI maximum working pressure.

Manifold System Components

ACTUATORS

WOM's Pneumatic and Hydraulic actuators are manufactured and tested to API 6A.

Liberal use of wear rings in WOM's actuator assure a long life.

WOM's actuator has single forged unitized top cap and cylinder for simple in-line maintenance. WOM's quick disconnect mechanism for the actuator allows fast removal without disturbing the body / bonnet connection. Provides immediate access to stem packing.

Anti-explosive decompression seals and energized non-elastomeric lip seals are available.

Factory preset drift eliminates the need for field adjustments.

WOM proudly celebrates 40 years of providing the oil & gas industry with meticulously designed, well-engineered pressure and flow control equipment. WOM looks forward to continuing to make a positive impact on the process of safely extracting one of the world's most precious resources. We are honored to work with the businesses that have trusted our commitment to excellence and appreciate each member of our group that has contributed to our success.

Magnum Technology Center
A WOM Group Company

We are Worldwide Oilfield Machine (WOM) - a global company pioneering Flow Control Solutions for the Surface & Subsea sectors of the oil & gas industry. Headquartered in Houston, Texas, we have manufacturing facilities, engineering centers, sales offices and assembly/testing workshops all over the world.

Our strength is our robust infrastructure that allows us complete control over quality, costs and delivery. With more than 20 patents and noted accreditations, our very own R&D facilities and 24x7 service centers across the globe we have the required capabilities & resources to deliver all your manufacturing needs for the industry.
